CURRENT POSITION

Post-doctoral researcher, *University of Cologne* 2025 – 2027
ERC project “Housing, Inequality, and Public Policies”, lead by [Sebastian Sieglösch](#)
Affiliated researcher, *LIEPP, Sciences Po* 2025 – current

EDUCATION

PhD in Economics, *Paris School of Economics* 2020 – 2025
Title: Three essays on housing markets and land use regulation
Advisors: Laurent Gobillon, Pierre-Philippe Combes
Referees: Bertrand Villeneuve, Benoit Schmutz-Bloch
Examiners: Gabriel Ahlfeldt, Camille Hémet
M.Sc. in Economics, *Paris School of Economics* 2019
B.Sc. in Economics, and B.A. in Sociology, *Ecole Normale Supérieure Paris-Saclay* 2015 – 2020

RESEARCH

Primary fields: Urban economics · Environmental economics

Secondary fields: Political economy · Public economics

◇ JOB MARKET PAPER

Build at your own risk. Integrating climate hazards in land use regulations

As climate risks intensify, governments increasingly use building mandates to limit future exposure. I study France’s Risk Prevention Plans, which combine public hazard disclosure and mandated resilience standards in a natural-disaster insurance system where premiums do not vary with exposure. I build a near-comprehensive geocoded dataset of plans for mainland France and combine it with property transactions, building permits, and land-use data. Plans reduce new development at the extensive margin by around 20%, with limited impacts at the intensive margin. Price responses are sharply heterogeneous across hazards. Flood risks are barely capitalized, while shrink-swell risks, a pervasive but understudied hazard, generate economically large discounts and stronger evidence of an adaptation premium. The results show that regulation curbs new development, but price capitalization is driven less by the supply restriction itself than by how buyers perceive and insure the underlying hazard. A within-city spatial-equilibrium framework organizes the mechanisms and provides the basis for counterfactual welfare analysis.

◇ WORKING PAPERS

Mayors Strike Back: Evidence from Land Use Regulation (Submitted)

with [Guillaume Chapelle](#) and [Camille Urvoy](#)

When a national government relaxes a local regulation, do local officials comply, or find other ways to keep the same rules in place? We study a 2014 French reform that abolished floor area ratios (FAR), a widely used cap on building density, with the explicit goal of expanding housing construction. We assemble a new geospatial panel

tracking three zoning tools — floor area ratios, building heights, and coverage ratios — over 15 years across 118 municipalities in the Paris region, linked to building permits, housing stock, and transaction prices. Comparing municipalities where FAR existed before the reform to those where it did not, we show that local governments offset the deregulation by tightening the two instruments they retained: maximum heights fell, coverage ratios tightened, and permit denials rose. Density did not increase in previously regulated areas, and we detect no effect on prices, consistent with the limited change in supply. The regulatory tightening was strongest where mayors faced closer elections and where property values are higher, not where mayors belong to parties opposing the reforming government, pointing to electoral accountability rather than partisanship. Top-down deregulation can therefore be substantially undercut when local governments retain complementary instruments, suggesting reforms must either limit local discretion directly or realign local incentives.

The Other Half of the Market. Multifamily Land and the Measurement of Urban Land Values in France (Submitted)

with [Guillaume Chapelle](#), [Arthur Lemoine](#), [Alain Trannoy](#) et [Etienne Wasmer](#)

Estimates of urban land values typically rely on plots purchased for single-family houses, the only segment systematically observed in public data. This paper combines the universe of French real-estate transactions with the digitized cadaster to develop a new transaction-level methodology for identifying land acquired for residential development between 2010 and 2019, distinguishing single-family from multifamily parcels. Multifamily parcels account for only 5% of transactions but 55% of new housing units and imply central land values three to four times higher than estimates based on single-family plots alone. Over the decade, adjusted multifamily land prices rose by about 50%, compared with about 10% for single-family land.

◇ WORK IN PROGRESS

OTHER RESEARCH EXPERIENCES

Research stay , <i>Humbolt University</i> , invited by prof. Gabriel Ahlfeldt	July 2026
Researcher , <i>LIEPP, Sciences Po</i>	
Project “The role of land in real estate markets”	2023 – 2024
Research stay , <i>Fundação Getúlio Vargas</i> , Rio de Janeiro, invited by prof. Sophie Mathes	July 2023
Research stay , <i>Wharton School, University of Pennsylvania</i> , invited prof. Gilles Duranton	Spring 2023
Research assistant , <i>Harvard University</i> , for prof. Stefanie Stantcheva	2020
Intern , <i>French Ministry for Environment</i>	2018
Report: “Effectiveness of fiscal measures on land take,” with Géraldine Ducos and Vincent Viguié (CIRED)	

CONFERENCES AND PRESENTATION

2026: 13th annual conference of the French Association of Environment and Resources Economists (LEDi, CESAER, Dijon)*, 7th World Congress of Environmental and Resource Economists (NOVA, Carcavelos – Cascais) ; 74ème Congrès de l'Association Française de Science Économique (LEMNA, Nantes) ; 25th RIEF Doctoral Meetings (RITM, Université Paris-Saclay) ; Workshop in Urban Economics and Economic Geography (University of Reading) ; AFÉPOP annual conference (BETA, Strasbourg) ; ECONtribute Workshop in Applied Economics (University of Cologne / Max Planck Institute) ; 2nd Workshop of Early Career Women in Economic Geography and Spatial Economics (LSE) ; Lisbon Urban and Public Economics Workshop on Housing (IESEG, Lisbonne)

2025: Applied lunch seminar (University of Cologne)

2024: Doctorissimes (Paris 1 / PSE) ; PhD seminar on economics and environment (CIRED) ; Echoppe - The Economics of Housing and Housing Policies (TSE) ; Journées de Microéconomie Appliquée (LEM, Lille) ; 13th European meeting of the Urban Economics Association (Aalborg University, Copenhagen) ; Labor and Public Economics internal seminar (PSE) ; European Economic Association (Erasmus School of Economics, Rotterdam) ; Causal inference with spatial data workshop (RWI, Essen) ; Winter school in urban economics (LEDi, INRAE, Dijon)

2023 : Urban and Real Estate Seminar (Wharton) ; Doctorissimes (Paris 1 / PSE) ; 12th European meeting of the Urban Economics Association (Bocconi) ; 10th annual conference of the French Association of Environment and Resources Economists (CEE Montpellier) ; External economics seminar (EPGE-FGV Rio de Janeiro) ; Poster at CEPR Paris Symposium (Sciences Po) ; Regional and urban Economics Seminar (PSE)

2022: 21st journées Louis-André Gérard-Varet (international conference in public economics, AMSE), 11th European meeting of the Urban Economics Association (LSE); Applied lunch seminar (PSE) ; Labor and public economics internal seminar (PSE)

2021: PSI-PSE doctoral seminar (PSE) ; Industrial risks seminar (PSE)

AWARDS AND GRANTS

Fondation Palladio , Fellowship	2023 – 2024
ADRES , Conference participation grant	2022 and 2023
Ile-de-France region , Mobility grant	2023
PSE , Mobility grant	2022
CEPREMAP , Research grant	2021
EUR-PSGE , Research grant	2021
Paris 1 University , Full doctoral fellowship	2020 – 2023
ENS Paris-Saclay , Full scholarship	2015 – 2019

TEACHING

<i>Housing economics</i> , in <i>Advanced public economics</i> , Instructor, Graduate	Spring 2025 and 2026
<i>Public policy analysis with R</i> , Teaching assistant, Graduate	Fall 2022
<i>Public policy evaluation</i> , Teaching assistant, Graduate	Fall 2020 to 2022
<i>Tools for critical data analysis</i> , Instructor, Undergraduate	Fall 2021
<i>Mathematics for quantitative social sciences</i> , Instructor, Undergraduate	Fall 2019
Sciences Po , Paris	
<i>Introductory econometrics</i> , Teaching assistant, Undergraduate	Spring 2021 and 2022
Paris 1 Panthéon Sorbonne University	
<i>Mathematics</i> , Teaching assistant, Undergraduate	2016
Lycée Lakanal , Sceaux	

SCIENTIFIC AND ADMINISTRATIVE ACTIVITIES

Scientific reviewer

- Journals: *Regional Science and Urban Economics*
- Conferences: European Association of Young Economists Annual Conference (2025, 2026)

Representative of Paris School of Economics PhD students (~ 150 students) 2023 and 2024

Member of the Strategic Committee (CLEOR) of PSE

Member of the Ethics Committee of PSE

Organizer of the Spatial Data Workshop – joint between PSE, Paris 1, IRD December 2023
